#### Number: Fractions (including Decimals and Percentages) National Centre Teaching of Mathematics

COUNTING IN FRACTIONAL STEPS								
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6			
	Pupils should count in fractions up to 10, starting from any number and using the1/2 and 2/4 equivalence on the number line (Non Statutory Guidance)	count up and down in tenths	count up and down in hundredths					
		RECOGNISIN	G FRACTIONS					
recognise, find and name a half as one of two equal parts of an object, shape or quantity	recognise, find, name and write fractions $1/3$ , $1/4$ , $2/4$ and $3/4$ of a length, shape, set of objects or quantity	recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators recognise that tenths arise from dividing an object into 10 equal parts and in dividing one – digit numbers or quantities by 10.	recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten	recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents (appears also in Equivalence)				
recognise, find and name a quarter as one of four equal parts of an object, shape or quantity		recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators						
COMPARING FRACTIONS								
		compare and order unit fractions, and fractions with the same denominators		compare and order fractions whose denominators are all multiples of the same number	compare and order fractions, including fractions >1			

## Number: Fractions (including Decimals and Percentages)

	COMPARING DECIMALS						
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6		
			compare numbers with the same number of decimal places up to two decimal	read, write, order and compare numbers with up to three decimal places	identify the value of each digit in numbers given to three decimal places		
			places ROUNDING INCLUDING DE				
		FOLUVALENCE	round decimals with one decimal place to the nearest whole number (INCLUDING FRACTIONS, DECIN	round decimals with two decimal places to the nearest whole number and to one decimal place	solve problems which require answers to be rounded to specified degrees of accuracy		
	write simple fractions	recognise and	recognise and show, using	identify, name and write equivalent	use common factors to simplify		
	e.g. $\frac{1}{2}$ of 6 = 3 and recognise the equivalence of $\frac{2}{4}$ and $\frac{1}{2}$ .	show, using diagrams, equivalent fractions with small denominators	diagrams, families of common equivalent fractions	fractions of a given fraction, represented visually, including tenths and hundredths	fractions; use common multiples to express fractions in the same denomination		
			recognise and write decimal equivalents of any number of tenths or hundredths	read and write decimal numbers as fractions (e.g. $0.71 = \frac{71}{100}$ )	associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction		
				recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents	(e.g. $\frac{3}{8}$ )		
			recognise and write decimal equivalents to $\frac{1}{4}$ ; $\frac{1}{2}$ ; $\frac{3}{4}$	recognise the per cent symbol (%) and understand that per cent relates to "number of parts per hundred", and write percentages as a fraction with denominator 100 as a decimal fraction	recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.		

National Centre

for Excellence in the Teaching of Mathematics

### Number: Fractions (including Decimals and Percentages)

	ADDITION AND SUBTRACTION OF FRACTIONS					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	
		add and subtract fractions with the same denominator within one whole (e.g. $\frac{5}{7} + \frac{1}{7} = \frac{6}{7}$ )	add and subtract fractions with the same denominator	add and subtract fractions with the same denominator and multiples of the same number recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number (e.g. $\frac{2}{5} + \frac{4}{5} = \frac{6}{5}$ = $1\frac{1}{5}$ )	add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions	
		MULTIPLICATION AND I	DIVISION OF FRACTIONS			
				multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams	multiply simple pairs of proper fractions, writing the answer in its simplest form (e.g. $1/4 \times 1/2 = 1/8$ ) multiply one-digit numbers with up to two decimal places by whole numbers	
					divide proper fractions by whole numbers (e.g. $\frac{1}{3} \div 2 = \frac{1}{6}$ )

### Number: Fractions (including Decimals and Percentages)

PROBLEM SOLVING						
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	
		solve problems that involve all of the above	solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number	solve problems involving numbers up to three decimal places		
			solve simple measure and money problems involving fractions and decimals to two decimal places.	solve problems which require knowing percentage and decimal equivalents of ${}^{1}/{}_{2}$ , ${}^{1}/{}_{4}$ , ${}^{1}/{}_{5}$ , ${}^{2}/{}_{5}$ , ${}^{4}/{}_{5}$ and those with a denominator of a multiple of 10 or 25.
