

Kingfisher FRENZY

APRIL 2019

FOR THE HOLY TRINITY COMMUNITY

Welcome to the Spring issue of *Kingfisher Frenzy*!

Our team of Year 6 newshounds have been hard at work sniffing out stories around the school and delving into some interesting topics, while our talented illustrators have been creating some stunning artwork.

In this issue, we speak to Mrs Cox as she prepares for her last term at Holy Trinity, we turn the spotlight on endangered animals, look at electric super cars, and we find out who are the teacher's pets!

We wish you a very happy Easter from the *Frenzy* team: (L to R, back row first) **Rodrigo Hevia, Jake Knaggs, Felipa Rosas, Ellie Jones, Ffion Hardy, Charlie Evans, Elena Hind, Emma Russo, Meggie Bodoano, Abigail Grace, Wiki Bialowas, Sophie Rinck, Hanna Kelly and William Streek.**

HT NEWS

HT sews seeds for a healthier future

The Junior Leadership Team (JLT) will be busy working with the Eco monitors next term to establish Holy Trinity's first vegetable patch.

It will be located outside the Year 6 classrooms and will be overseen by Mr Hambling, who is in charge of JLT.

"We are getting a vegetable patch because we can then provide healthier and fresher food for the school lunches and reduce the use of palm oil," Mr Hambling said. "It will also educate the children on what is healthy to eat."

This will take place after Easter and our caretaker, Mr Bell, will help make the vegetable patch.

Kingfisher Frenzy wanted to know what other people think about the plans, so we hit the playground and asked the same question; "What do you

think of the vegetable patch?"

Rameez from Koala Class said: "It is a good thing as vegetables which are fresher are even healthier for you and even better."

Ruby in Otter Class spoke to us. "It is a good improvement because then more people can eat tastier, healthier vegetables," she said.

Nils from Eagle Class answered: "This is a good thing that is going to happen because vegetables are good for you but fresher ones are even better for you."

William Streek and Jake Knaggs

The egg-traordinary history of Easter chocolate

We give chocolate eggs at Easter but do you know why?

Eggs symbolise new life and rebirth and the custom of giving eggs to celebrate this can be traced back to Egyptian times. The chocolate eggs that we give today were made for

the first time in Europe in the 19th century.

The biggest chocolate Easter egg ever was made in Italy and weighed a whopping 7,200kg and was 19.6m wide!

And what do you know about

hot cross buns? They were first made by European monks in the 12th century and given to poor people during the month of Lent. They were then marked with a cross in honour of Good Friday.

Meggie Bodoano

Picture: Felipa Rosas

JLT ring in the changes

This year the Junior Leadership Team (JLT) has made quite a few changes around the school and we would like to share them with you.

The list below shows all of the things JLT has come up with so far:

- We recommended a Lego club, which will begin next term
- We have got some new sports equipment to be used at lunchtimes
- There will be a pet corner at the summer fair (but just to let you know, there will be no cats or dogs)
- In the summer, the juniors will be getting different, more seasonal fruit
- The egg and spoon race will be brought back at Easter
- Play buddies for the infants – Year 5 will once again go into the infant playground in the summer term to entertain the younger children
- And of course, the vegetable patch, which you can read all about on the front page.

William Streek

HT rock band brings the house down!

Holy Trinity's rock band has performed its first gig and the crowd loved them!

The band, made up of pupils from Year 5, played Seven Nations Army, originally by The White Stripes, and has received some wonderful feedback.

Oscar Lihn from Year 3 said the performance was good. "I'd like to see them again," he said. "The rock slide was cool and Seven Nations Army was a great choice of music."

Charlotte Wright from Year 6 said: "It was good and I love how they worked together."

Erin Hindle and Asya Yeldan, also from Year 6, told us: "It was really nice and we loved the knee slide at the end of the song!"

Melody Bullock from Year 5 said: "I enjoyed it a lot and really want to see more. Seeing everyone have fun and seeing my best friend in the band was so exciting."

Thomas Durrant, another Year 6 pupil, described the singers as "amazing!"

Picture: Rodrigo Hevia

Zebra class's Felicity Wright is in the rock band, and says she joined because she likes music and loves singing. "Our performance could have been better but it was amazing," she said.

Felicity has revealed that the band's next song will be Shape of You by Ed Sheeran.

If you fancy getting involved, the rock band is looking for new recruits. Now you're probably thinking "I don't play an instrument but I want to join the rock band!" Well, as well as drummers and percussionists, it also needs talented singers with lots of power and a loud, confident voice. So sign up!

Ellie Jones, Sophie Rinck and Abigail Grace

Imaginations run wild in writing competition

Pupils at Holy Trinity have recently taken part in a short story writing competition and the winners have been revealed.

The competition was running alongside a national competition run by the BBC that asks children aged five to 13 to put pen to paper to compose an original work of fiction using no more than 500 words.

Picture: Rodrigo Hevia

Nearly half a million pupils around the country have written a story since the competition began in 2012 and written around 277 million words!

Mr Auton was in charge of HT's completion this year, and he did an excellent job of making it intriguing.

"I was very impressed at the large number of entries we had and the quality," Mr Auton said. "I loved reading about dragons, evil scientists, princesses, talking bears - it was very clear that pupils at HT have a very vivid imagination."

Mr Auton has selected winners in each

class and their prize is a certificate and a book of their choice.

The class winners are: Dolphin: James Ruane, Penguin: Emily Bellingham, Sophie Siminova and Leo Sorrano, Lion: Jennah Arrigo and David Dias, Leopard: Phin Thornhill and Emily Eszenyi, Kestrel: Evie Atkin, Falcon: Louis Knight, Owl: Lina Arrigo, Eagle: Leo Foster, Seal: Apolenka Delevante, Otter: Elicia Tonge, Zebra: Sophie Foster, Giraffe: Isabelle Cook, Panda: Elena Hind and Koala: Thomas Durrant.

Well done to all the winners.

Hanna Kelly

Mrs Cox shares her Holy Trinity highlights

Our wonderful head teacher Mrs Cox has been teaching for 21 years. She has spent 14 of them at our school and has been head since September 2006. As you know she has decided to “pass her baton” to a new head teacher at the end of this academic year.

Mrs Cox has been fantastic and caring and has made our school an Outstanding place. *Kingfisher Frenzy* has asked her about her journey through the school and what she'll miss about Holy Trinity.

Q: What will you miss most about our school?

A: I'll miss so many things. I know that what I'll miss most is the children with all their smiles and hellos. I'll miss all the fun and lovely activities like World Book Day, class assemblies and the Christmas and summer fairs. This is a very special place filled with wonderful children, staff and parents. I think that I'll really miss the sense of being part of a community.

Q: Has your experience at Holy Trinity been memorable and if so, what was is your favourite memory?

A: I think that when I am an old lady I will look back at my time at Holy Trinity and feel amazed by all the things that I experienced. I don't think that it's possible to pick out one memory out of all of them. It's like looking at a box of your favourite chocolates and not knowing which to pick first.

I'll always remember really special occasions like when the whole school learnt the “Holy Trinity” song. I also remember the very first Carols by Candlelight, my first visit to the O2, and the nativities and Year 6 productions have also made me cry with happiness. I love it when I see the children coming together to produce something joyful.

Q: Who has helped you throughout your years at Holy Trinity and how?

A: Miss Ashby!! She is so positive and loyal and just lovely to work with. The rest of the staff have always been very kind too. For example, Mrs Velumyl has always given me some of

her homemade cakes at the end of each term - things like that make a big difference. I've also made some very special friends here.

I also believe that God has helped me; he's given me wonderful, generous people to work with and also the physical strength to do the job.

Q: What did you do before being our head teacher?

A: I was the Deputy Head at Holy Trinity (before Miss Ashby joined us) and before that I was a teacher. Before I was a teacher, I worked for Waitrose!

Q: What made you want to be a head teacher?

A: I never really planned to be a head teacher but I fell in love with this school when I became the deputy here and I wanted to help it become the best place it could.

Q: How has the school changed since you arrived?

A: In lots of ways. It was much smaller for a start - we had less than half the children that we have now!

Q: What was your proudest moment at HT?

A: I think when the school was given an Outstanding by Ofsted. I was so proud to have all the hard work of all the staff, the children, the governors and the parents recognised in this way.

Q: And do you think you have done the best you could have done?

A: Yes, I do. I couldn't have tried any harder. I know that I don't always do things well, but I've always given my best.

Q: How did you feel when you received your MBE?

A: Out of this world - it was like a dream. What a memory that will be, but it wasn't as special as all you children are to me.

Scientists get their teeth stuck into great white shark research to cure diseases

Scientists in America have been examining great white shark DNA and hope they will be able to use their findings to find cures for human diseases like cancer.

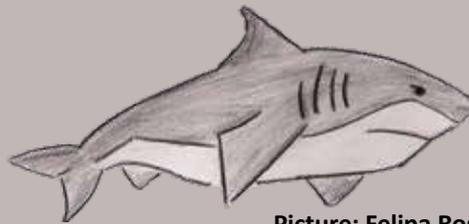

Every single cell in all living things has a copy of a genome, which contains a complete set of DNA that is unique to each creature.

Scientists at Save Our Seas Foundation shark research centre in Florida have decoded the great white shark genome. These amazing animals have evolved to live a long and healthy life and to heal their wounds quickly. They also, most importantly, rarely seem to suffer from cancer.

A great white shark's genome contains mutations which are permanent alterations in genes and they help to prevent cancer.

The scientists are now going to try and place some of the genome into mice to see if it stops them getting sick. If that works they will possibly split some of the genomes into human bodies. But if this is possible, it will take a long time to actually happen.

Ellie Jones and Sophie Rinck

Picture: Felipa Rosas

Kingfisher Frenzy loves animals! We are going to look at the creatures behind our class names. This issue: Pandas and Koalas.

Giant Panda

- Since 1990 giant pandas have been on the endangered species list but have recently recovered enough to be removed.
- In China, pandas are considered a symbol of peace. Hundreds of years ago when tribes were fighting, warriors would raise a flag with a picture of a panda on it to stop a battle or to call a truce.
- The Chinese word for panda is Daxiongmao, which means giant bear cat.
- Pandas have carnivorous teeth (which means they have teeth for eating meat from other animals) even though they only eat bamboo.

Picture: Rodrigo Hevia

• Their teeth still haven't adapted to be herbivorous teeth (animals that eat plants).

Koala

- Koalas are not bears, they are marsupials, a group of mammals that have pouches where their babies develop.
- A Koala's lifespan is 13 years in the wild and 18 years in captivity.
- Koalas eat eucalyptus leaves, which are poisonous, but koalas have long digestive organs so they can handle the poison.
- These magnificent creatures get their name from an Aboriginal term meaning No Drink. Koalas get almost all of their moisture from the leaves they eat and rarely drink water.
- Sadly, around 80 per cent of koala habitat has been lost due to house building, drought and forest fires.

Picture: Rodrigo Hevia

Save our wildlife from poachers

Dozens of animal species could become extinct in the next few years because they are being killed for their horns, fur or other body parts.

Animals including tigers, rhinos, leopards and elephants are often killed by people called poachers, who sell their tusks or fur for money.

United for Wildlife is a charity and it says around 100 elephants are killed by poachers every day and they could become extinct in the wild by 2025.

Elephant horns are made of ivory and you can make lots of money out of them. Ivory can sell for over £1,000 per pound, and some big elephant tusks can weigh around 250 pounds.

In many countries it has become illegal to sell or purchase ivory but lots of bad people sell and buy ivory in secret. In countries like Africa, where they have protected animal reserves, people are working hard to stop poachers coming onto their land and killing the animals. The reserves send patrols to try to capture the poachers and put barbed wire around the borders to keep them out.

Charities such as WWF, International Elephant Foundation, and The WILD Foundation, raise money and try and stop poachers stealing our beautiful creatures.

In just the past seven years, African elephant populations in the savannas have dropped by 30 per cent. Similarly, the number of elephants living in forests have dropped an incredible 62 per cent from 2002 to 2013.

Hanna Kelly

Electric super cars spark up

London is trying to clean-up its air quality and is introducing new rules about how much pollution vehicles driving into the city produce.

The Ultra-Low Emission Zone will come into force on 8 April and means that high-polluting cars and vans will only be able to drive into central London if they pay a daily charge of £12.50. It will be extended as far as Richmond in 2021.

This rule will make the city's air cleaner and encourage people to get rid of their diesel and petrol cars and buy electric cars instead. The International Energy Agency thinks there will be 125 million electric cars on the world's roads by 2030. At the moment there are about 5.1 million, with over 1.3 million in Europe in 2018.

Electric cars have been in production since 1996 and one of the first was the Nissan Leaf, which was followed by lots of different electric cars ranging from SUVs to high-performance sports cars, which are also called super cars.

One of them is the Tesla Roadster 2020. Tesla made an earlier model in 2008, but wanted to make a newer and faster version. It has a top speed of over 250 miles per hour (mph), can go from 0-60 mph in 1.9 seconds, 0-100 mph in 2.1 seconds, and it can cover a quarter of a mile in 8.8 seconds!

Picture: Pininfarina Battista by Charlie Evans

The Bugatti Veyron, which runs on petrol, is one of the fastest road-legal cars in the world, with a top speed of 261 mph. The Tesla is electric and only slightly behind at 250 mph. The cost of the first 1,000 Tesla Roadster cars will start at £190,000 dropping to £150,000 after those have been sold.

Electric super cars are becoming more popular. The new Pininfarina Battista has 1,900 brake horse power and a top speed of 255 mph, making it the most powerful road-legal car ever made. It has twice the power of a Formula 1 car and is 12 and a half times more powerful than a top of the range Ford Focus.

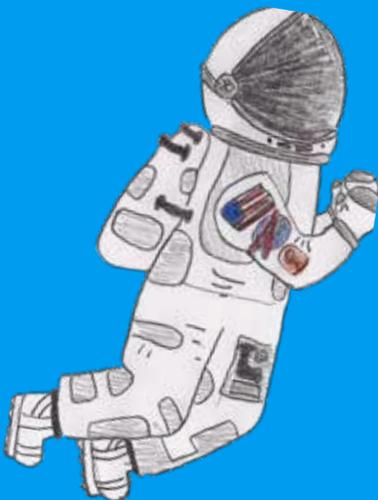

The Pininfarina can drive for roughly 280 miles before it needs to be charged. But if you want one, it will cost you £2 million!

Charlie Evans

One giant leap for mankind

This year is the 50th anniversary of the first man to walk on the moon.

Neil Armstrong was part of the Apollo 11 mission that landed on the moon on 20 July 1969. He made history when he left the lunar module and

Picture: Felipa Rosas

became the first human to step on the moon's surface.

He went on his mission with fellow astronauts Michael Collins and Buzz Aldrin. When they arrived they spent two hours collecting rock samples and taking photographs. Eventually, the spacecraft returned to Earth on 24 July 1969 and the three astronauts were congratulated and praised.

Neil Armstrong had taken the first ever step on the moon! He famously said: "That's one small step for man, one giant leap for mankind." The moon landing and was watched by 530 million people around the world.

In 1955 – when Neil was young – he joined the National Advisory Committee for Aeronautics (NACA), which later became National Aeronautics and Space

Administration (NASA). Sadly Neil Armstrong died at the age of 82 on 25 August 2012 due to complications from heart surgery. But space travel and investigation has continued.

In March the SpaceX Crew Dragon went on a successful test mission and attached to the International Space Station. SpaceX was founded by Elon Musk, who also founded Tesla.

No astronauts were on board, but a model of a human, called Ripley, did go. Ripley wore sensors so scientists could know how a human would feel and react if this rocket were to be a reality in the future. It is hoped that two astronauts could travel in the SpaceX craft in July, before later opening it up to normal people who want to go to space on holiday.

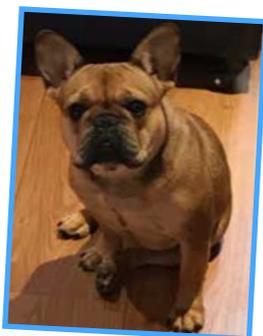

Elena Hind and Ffion Hardy

Kingfisher Frenzy resident newshound Emma Russo has been hot on the trail of the HT staff to discover

WHO ARE THE TEACHER'S PETS?

Have you ever wondered what the teachers get up to at home? What do they do in their spare time? Well, the *Kingfisher Frenzy* crew has investigated and found that they are keen on pets. No, we don't mean their favourite kids at school, we mean their **ACTUAL** pets! We discovered an array of crazy cats and dopey dogs, and some with some very unusual features!

Name: Phil
Species: Cat
Owner: Mrs Hill
Unique characteristics: Phil is actually a girl!
Mrs Hill says she doesn't want to change Phil's name so she is very unique!

Name: Lady
Species: French bulldog
Owner: Ms Ridall
Unique characteristics:
Lady is very lovable.

Names: Cecil and Wilbert
Species: Musk turtles
Owners: Mr and Mrs Brown
Unique characteristics: They are very friendly.
Mrs Brown especially likes it when they swim over to say hello.

Names: Queenie & Dolly
Species: Cats
Owner: Ms Flynn
Unique characteristics:
Very cute

Ms Flynn said: "I am very angry with them because one did a number two on the floor and the other one scratched my NEW furniture, so it's very lucky they're cute!"

Name: Tripod
Species: Cat
Owner: Mr Honnery (well actually his housemate's)
Unique characteristics: Tripod only has three legs

Names: Milo and Snickers
Species: Dogs
Owner: Mr Honnery's housemate (again!)
Unique characteristics: Their favourite food is cat food
"They're weird," says Mr Honnery.

Name: Brian
Species: Cat
Owner: Mr Bradshaw
Unique characteristics: Brian doesn't have a tail due to a car accident.
"I think all animals have the right to a human name," Mr Bradshaw said.

Name: Isabel
Species: Cat
Owner: Mrs Tompkins
Unique characteristics: Very cute.
Mr Bradshaw's theory of cats having human names isn't wrong after all!

Name: Blake
Species: Dog
Owner: Mrs Powell
Unique characteristics: Blake is blind.
Mrs Powell says: "Blake loves to lay on the sofa and because he is quite big, we all have to squeeze up on the sofa so that there is room for him too!"

Names: Summer and Bilbo
Species: Dogs
Owner: Mrs Wilkins
Unique characteristics: Bilbo is very playful which sometimes annoys Summer who is more sensible.
"Summer is very protective of my daughter and when Bilbo comes and play-fights with her, Summer gets very irritated," Mrs Wilkins said.

Names: Lorna and Sprinkles
Species: Fish
Owner: Mrs Tompkins
Unique characteristics: Lorna is named after Ms Shepley because she gave her to Mrs Tompkins!

Emma Russo

Welcome to Dogwarts!

With Harry Potter being so popular on World Book Day, we thought it would be fun to transform characters from the books into dogs!

- Harry Pomeranian
- Hermione Greyhound
- Ron Whippet
- Albus Dalmatian
- Severus Spaniel
- Mad Eye Maltese
- Draco Mastiff
- Neville Labrador
- Bellatrix Lhasa Apso
- Sirius Boston Terrier
- Voldemort Weimaraner
- Hagrid Hound

And they all live together at Battersea Dogwarts!

House Names

- Hufflepug
- Gryffincorgi
- Ravencockerspaniel
- Slobbering.

Elena Hind and Ffion Hardy

Harry Potter casts his spell over World Book Day

Pupils and staff dressed up as their favourite characters from books on Thursday 7 March to celebrate World Book Day.

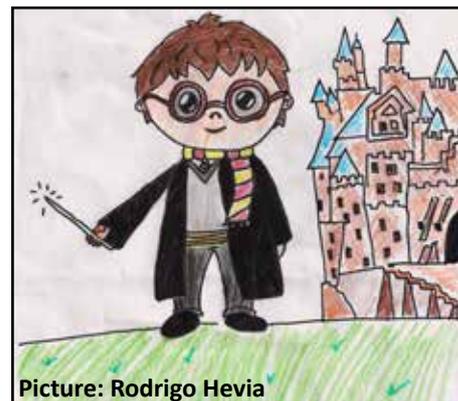

Harry Potter was definitely the most popular character with 24 people dressing in the Gryffindor robes and taking part in HT's annual parade.

The next most popular character was Harry's friend Hermione Granger with 10 pupils choosing to come as her, which was just as popular as the 10 teachers who dressed as crayons! There were six Boy in the Dresses and four Mary Poppins, while the Year 6 staff came as words from the dictionary.

World Book Day is a lot of fun and was originally started to encourage children to read and give every child and young person a book of their own.

The first World Book Day was held on

BOOKS

2 March 1995. It is marked in over 100 countries around the world.

Every child is given a book token that they can exchange for one of a selection of books published especially for World Book Day, or to get £1 off another book of their choice.

On the day, an author called David Mason came in to school and shared some poems from his books. He also did a drama workshop with Year 6, and Koala and Panda class wrote some excellent poems.

Wiki Bialowas

Review: Warrior Cats by Erin Hunter

The Warrior Cats series is a collection of books based on four clans of cats who battle endlessly. The four clans are called: Shadow Clan, River Clan, Wind Clan and Thunder Clan. The first book in the series is called Into the Wild.

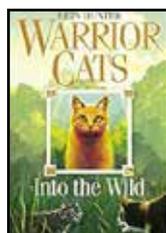

The protagonist is a brave young cat called Firestar. He starts life as a pet called Rusty but stumbles away from the safety of his home and only friend Smudge. He meets his new best friend Greypaw and the Thunder Clan leader Bluestar. He is offered a place in the clan, and begins an exciting new life. He later meets another cat, Ravenpaw, gets attacked by Longtail, and

is given the new name of Firepaw. He works his way through the different difficulties that life throws at him, even becoming leader and mates with his old enemy!

The prefix Paw is given to apprentices, Star is attached to leaders who also chose the name of their warrior cats.

I have enjoyed this book very much and give it a **10/10** and I hope you enjoy it as much as I have.

Abigail Grace

Review: Beetle Boy by M.G. Leonard

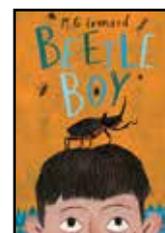

I strongly suggest you read this fantastic and exciting book about a young boy called Darkus. It is full of twists and turns and is relatively easy to read.

This magnificent book is quite sad at the beginning but all goes well. Darkus befriends a special type of rhinoceros beetle which he calls Baxter. Darkus's Dad, Doctor Batholowmew, suddenly disappears and there is seemingly no evidence to find him! So Darkus and his beetle friends go on a mission to locate and rescue him.

It is quite funny and exciting towards the end of the book, when a band of small, yet so powerful beetles, attack two enemy insect extermination workers. This plan is successful because Darkus and his two friends can communicate with the special and clever beetles. They form an intelligent plan so each beetle has a special part to distract or attack the offenders.

Many people would describe this 336-word book as a cracking mystery adventure.

I would rate Beetle Boy **4.6 out of 5 stars!** Jake Knaggs

SPORTS

HT SWIMS TO GOLDEN VICTORY

A Year 6 pupil has won a gold medal for Holy Trinity at the Richmond Borough Swimming Gala.

Max Stafford Davis, a pupil in Koala class, swam to victory in the final of the butterfly. Max has only recently joined the school, and told *Kingfisher Frenzy* that he felt "fine and normal" about his win.

Max is no stranger to swimming achievements – he is three-time county champion in breaststroke. He told *Frenzy* that he likes swimming because there are lots of other people like him with fantastic achievements as well. "Always push yourself above and beyond," he said.

Also representing HT at the swimming gala finals were Hanna Kelly, Mia Hardy, Tilly Allen, Zoe Lennon, Zac Dawson and Charlie Evans, who all qualified in heats held in February. They have been on a role recently and did extremely well to make the finals.

The results: Max Stafford Davis: Borough champion - first in butterfly! Hanna Kelly came 2nd in the small schools category and 10th overall in Richmond for backstroke,

Zoe Lennon was third in small schools freestyle and seventh overall, Zac Dawson came 6th in small schools freestyle and finished 18th overall, while Charlie Evans came

Picture: Felipa Rosas

4th in small schools in the breaststroke and 12th in the borough. Well done everyone!

Next, to netball. The girl's netball team entered the Borough Netball Tournament where they ended up playing in the plate part of the competition and reached the quarter finals. If they keep going this way, who knows, they might be on their way to becoming champions!

It's all about the girls this half term – the football team managed to get through their league unbeaten, but at the knockouts, unfortunately lost in the quarter finals to East Sheen.

The summer term is shaping up to be a busy one for sport. On 8 May Years 3 and 4 will play in a football tournament at Brentford FC's stadium, Griffin Park, which is sounding like it will be exciting.

The annual Borough Sports competition will take place on the 5 June – keep your eyes peeled to discover who will be representing Holy Trinity.

And last but not least, Rowling won the title as overall house champions at the recent Junior sports event that took place at Christ's School.

Follow HT's sporting progress on twitter at @HolyTSport.

EASTER FUN

Have a go at our egg-cellent Easter quiz!

- Why does Easter fall on a different day each year?
 - People like a change
 - It is on the first Sunday after the March full moon (vernal equinox)
 - The churches decide from year-to-year-what day it should be
- Easter was named after a goddess. Which one?
 - Eastre
 - Ellie
 - Esteru
- When Jesus was on the cross what did he pray for?
 - To get him out of this mess
 - To punish the wicked people doing this to him
 - To forgive these people because they didn't know what they were doing
- Who was the first person to see Jesus after he rose from the dead?
 - A soldier
 - A woman
 - A priest
- The Easter Bunny has not always been a bunny! What animal did it used to be?
 - Hare
 - Possum
 - Dove
- How many boxed Easter eggs will be sold in the UK this year?
 - 18 million
 - 80 million
 - 120 million

Fact finders: Hanna Kelly and Meggie Bodoano

EASTER WORDSEARCH

Fill your Easter basket with these words:

- Basket
- Bunny
